#### INTRODUCTION

Volume I of the *Egyptian Coffin Texts* explains the history of the project, the basis on which the texts have been arranged, and the conventions adopted. For the user's convenience we repeat here certain information of the last type.

Figures with an asterisk (1\*, 2\*, etc.) in the blank column to the right of any text column refer to the notes. These have, as far as possible, been given on the same page.

Dashes beside signs (|) mean that these signs were not seen by Dr. Gardiner or myself, but rest on some other authority—publication or manuscript copy. In the vast majority of cases the authority in question is the manuscript of M. Lacau. As most former copies or publications do not preserve the arrangement of the originals, my arrangement of the signs in these parts is wholly arbitrary.

The symbol \(\psi\) is employed to indicate that the signs or sentences separated thereby follow one another in the original without any break.

Sometimes a simple line | will be found. Such a line has no other intention than to guide the eye, for example, if a text starts near the bottom of a page, thus being far away from its designation in the heading of the page. If such a line occurs between words or groups of words, these do not follow one another immediately in the original.

The notes are very brief and have been confined to purely textual matters—corrections, erasures, and the like. Also, in the case of a complicated arrangement or disorder in the manuscript, they help the reader to visualize the original.

This is also the purpose of the plans which have been given of manuscripts or parts of manuscripts. These sketches are not drawn to scale and are only intended to give an idea of the real position and order of the lines. The plans given in this volume include details from the following coffins: B1Bo, B7C, and G1T on page 9; B2L on page 42; and G2T on pages 151 and 155.

The letters on the left-hand side of the page or of each group of parallel texts are meant to facilitate the quoting of the texts, which should in the editors' opinion be quoted by volume, page, and letter—for example, I 2 a, II 115 c, etc.

#### Man of By C front

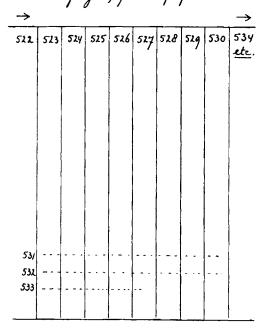

The reconstruction of the lost portion under columns 58-65 remains doubtful. Trobably one or two horizontal lines contained the text of 10 d, e, but it is impossible to determine exactly how much of the rest of the spell was found in this MS. There can be no doubt that the lower part of this section consisted of vertical columns, but how many of these lines are needed for the beginning of Spell 78 is again uncertain, their length being unknown.

1\* In SIC, G2T, S2C and Pap. Berl. this spell is a separate, independent unif; in B1B0, B2B0 and TIL it is part of a larger unit or com. pilation, Spells 90+89+ 91; in BIBO and B2Bo this larger spell is pre. ceded by Spell 93, which in B2BO also follows. B4C gives the sequence 89+91; 93+90, in which 8g and g1, g3 and go (= BD 65, Lepsius) are probably units. TiBe has a very different version; see Spell gr. In many MSS. Spell 89 occurs as part of Spell 96; see p. 84. 2\* Or does this title belong to Spell 84? It is, however, much longer than 4ga. 3\* Judging from the neighbouring lines about 12 groups are lost at end of line; perhaps blank 4\* -, = (read =?) or m

1\* Spells 94-97 are given here, because they contain interalia a variant of Spell 89. The M. texts seem to regard them as one Spell, where. as the B. texts have subdivisions. Curiously enough the variant of Spell 89 is not such a subdivision. 2\* This MS. is so fragmen. tany that the length of the lines can be determined only approximately. 3\* The MS. is now lost except a fragment; see p. 85,3\*. As regards the rest of the MS. my text is a compilation of the published text (Rec. de Trav. XVI 131) and Lacau's corrections (Sarcophages I 130 f.) 4 \* This publication is also our only source for part of M37C; Lacan loc. cit. 133: les variantes du texte imprimé sont empuntées à 28041 (= M37C). For the upper part of ll. 25 ff. we have Lacau, Sar. cophages pl. XVII. 5\* Traces insufficient, they suggest:

1\* Tiny traces suit this reading given by Chassinat-Palanque, Touilles ... d'Assiout, p.81, n.7.

2\* End of line; 290 b follows.

3\* The scribe tried to change the first v into  $\chi(^{nn}_{n})$  by adding a stroke at the back of it, but then he canceled the sign by means of a red stroke, and added  $^{nn}_{n}$  at the left.

4\* Or  $^{nn}_{n}$ , the same form also elsewhere in this MS.
